- *Tennis Court*

# Farm House Live with Nature

## Green Valley Farm Villa Plot

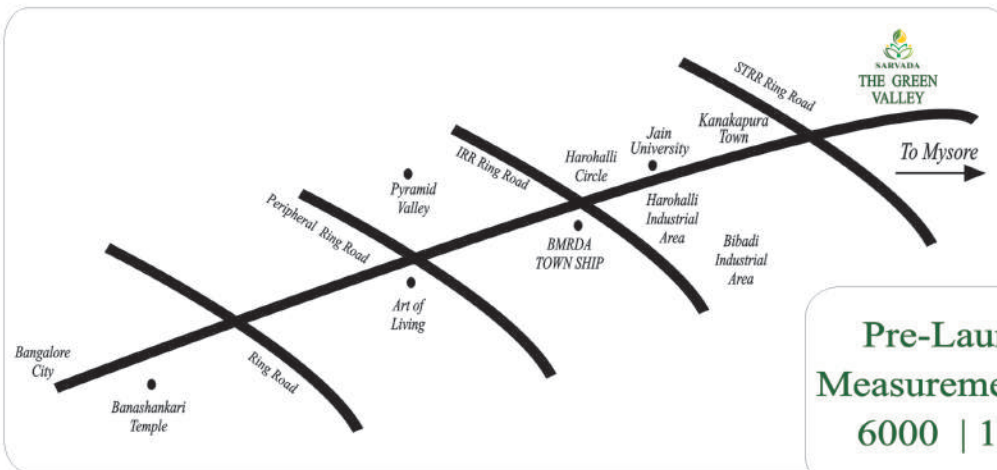

*Namely, farm houses allow you to enjoy the tranquility of the nature, breathe fresh air, strengthen your mental and physical health. The degree of pollution is dramatically lowered, the tension seems to magically go away, and violence and crime-related events are less likely to occur here. Living outside major cities – as these are the normal locations of farm houses will also allow you to cuddle pure peace and serenity.*

*Renting some of your farm house property is also a great idea that could be generating some extra incomes. Think of your years of retiring and picture yourself taking full advantage of the funds generated by your rentals, while still enjoying your peaceful country cottage or farm house.*

## Location
